

North Texas Shredding

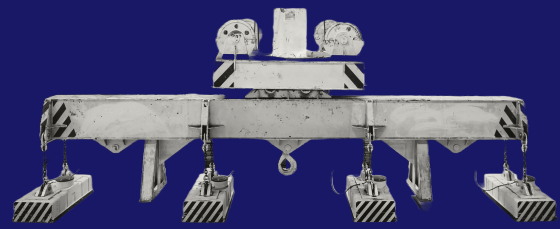

Understanding High Grade Twitch

It's all in the chemistry.

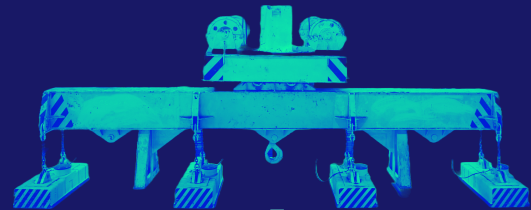

Start with
high-quality
automotive heavy
Zorba feedstock.

Polish and clean the feedstock to remove dirt
and contaminants and loosen particulates.
Magnetized separation precedes electrostatic
separation (ECS).

NTXS Twitch includes
additional proprietary
resorting, and separation
of cast and sheet aluminum
from the Twitch product,
resulting in superior
chemistry and purity
levels that align with
existing and developing
auto industry standards.

NTXS High Grade
Twitch

We also refine Copper,
Brass, Zinc, e-Waste, and
Stainless into high-grade
non-ferrous shredded
packages.

Low Zinc, Low Mag, New chemistry in Q20
